Electronic Warfare Systems

EWIS (Electronic Warfare Integrated Solution) is a complex modular solution for Electronic Warfare Command, Control and tasks like Electronic Support Measures, Electronic Counter Measures and Electronic Protected Measures in symmetric and asymmetric conflicts as well.

STAR - Protection RCIED Jammers Family

STAR family jammers are especially intended for a protection...

STAR COM - VHF/UHF Communication Jammer

The VHF/UHF portable automated remote controlled communication...

SYMON - Modular COMMS-ESM/COMINT System

The system SYMON is intended for very fast automated re...

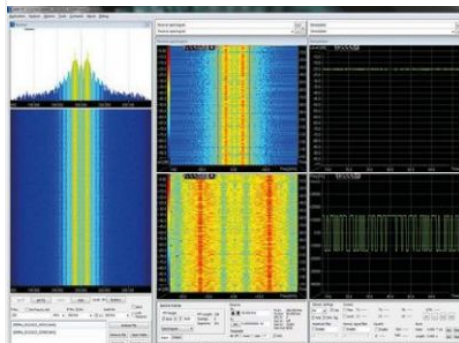

SYMON Light - The Portable Radio Surveillance Station

Symon Light is a portable system (manpack) for monitoring...

AKRS - Radiosignal Analysis and Classification

System for technical analysis of digitized radio signals....

IZ225 - Radio Receiver

Complete wideband COMMS-ESM/COMINT tuner/digitizer (receiver)...
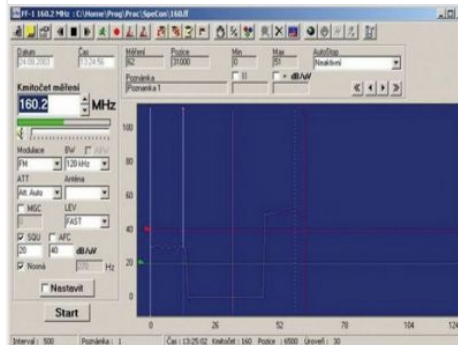

POLIS - Police Command, Control and Operation System

POLIS (POLice Integrated Solution) is a comprehensive and...

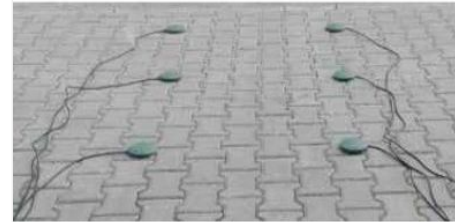

SPECON - Spectrum Control SW

SW intended for frequency monitoring and searching new radio...

emSENSOR - Passive detection system

emSENSOR is used as a detection system to alert to unauthorized...

INCREMO - Recording and Information System

High-tech recording and information system (INCREMO) is...

pTRACK-III - Tracking and Localization System

pTRACK III. generation is a tracking and localization system....

GEO3D - Geographical Visualizations

GEO3D is simple and open system which allows for real-time...

ANDROMEDA - Electronic protection against unmanned aerial systems

ANDROMEDA system is a complex electronic solution against...
