

Good News for our European customers

Press Release - Lightweight military HF radio with heavyweight capabilities from Codan gets NATO Stock Number

Codan announces the NATO Stock Number for the [Military Manpack](#).

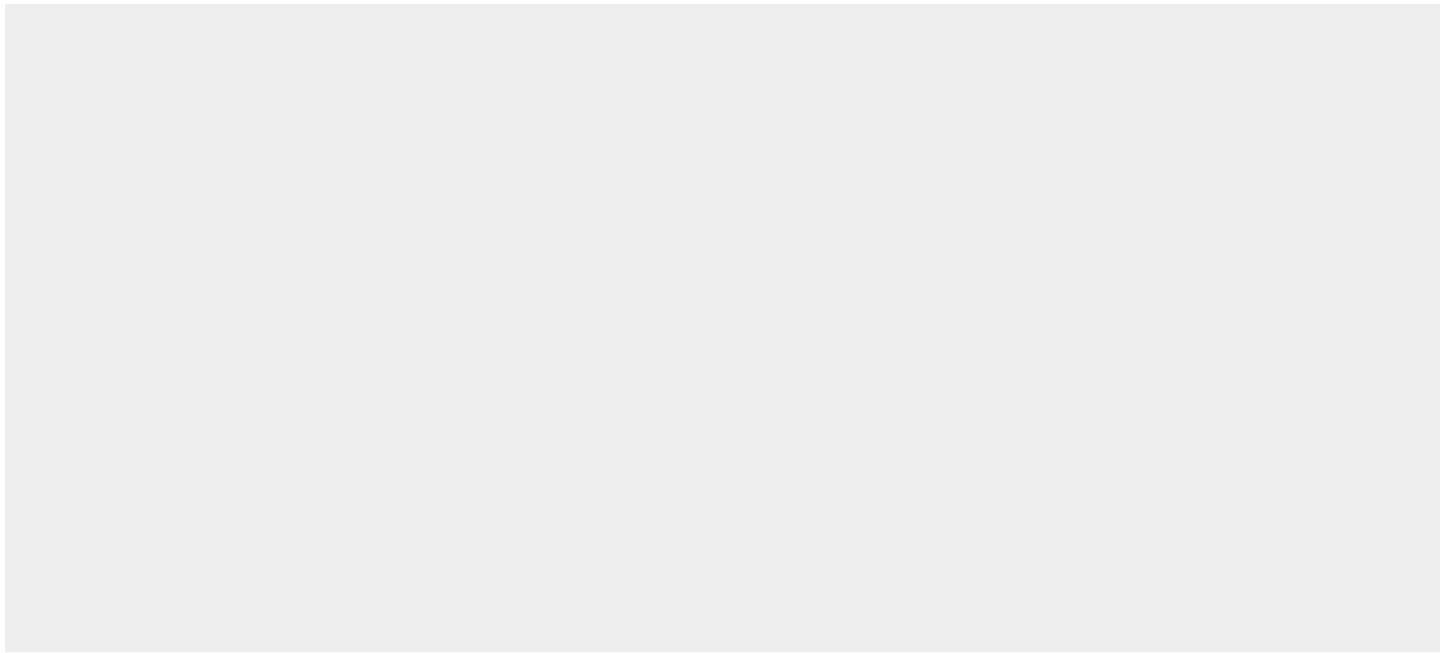

To re-inforce Codan's entry into the military market with reliable and affordable HF communication complying with military and in particular NATO Standardization Agreements (**STANAGs**), Codan today announces the NATO Stock Number for the **2110M**. This **ruggedised HF radio** weighing 2.5 kg with 50 hours of operating time performing to MIL-STD-810F now has NSN 5820-99-602-7549.

Codan is excited by the continued partnership with NATO and the prospects of supporting mission critical communication with capable radios.

For more information on the Codan [HF Military radios](#) please see [Codan 2110M data sheet,video](#)
